

Installing the module

- 1 In the back office, open `Modules > Module Manager`.
- 2 Click **Upload a module**, at the top right of the screen.
- 3 Drag the **.zip** file you downloaded after your purchase into the drop area, without unzipping it.
- 4 Wait for the installation to finish, then click **Configure**.

You can reach the screen again at any time from the **Configure** button in the module manager.

After installation

Create a link list, tick the theme locations where it should appear, then add its links (URL, product, category or CMS page). The switch at the top of the screen adds the module to the **Modules** menu.

Full documentation

Find the module and its updates on the FreshApp.io shop:

<https://shop.freshapp.io/en/>

Updating: just drop the new archive through the same path. PrestaShop detects the version and runs the upgrade; your settings are kept.

Compatibility

PrestaShop	PrestaShop 1.7.8 → 9.x
PHP	PHP 7.4 → 8.4
Bundled languages	Français, English
Module version	1.1.2

Support

A question about installing or using the module? Use the *Support* tab on the product page on PrestaShop Addons: requests are tracked there and you get the answer by e-mail.
